

# **Goldeye**

#### CL-034 XSWIR 2.2 TEC2

- Camera Link InGaAs camera
- VGA resolution
- Active sensor cooling
- Simple setup via GenCP
- High dynamic range
- 303 fps

#### See the invisible

Short-wave infrared (SWIR) cameras with InGaAs sensor technology

Goldeye CL-034 XSWIR 2.2 TEC2 with FPA 636  $\times$  508 | 15  $\mu$ m | Extended Range InGaAs runs 303.0 frames per second at 0.3 MP resolution.

Goldeye cameras are equipped with InGaAs sensor technology making them sensitive in the short wave infrared spectrum ranging from 900 nm to 1,700 nm. Some models have extended sensitivity in the visible spectrum down to 400 nm or up to 2200 nm. All Goldeye SWIR cameras can be operated at very high frame rates and capture outstanding low-noise images. They are the perfect choice for industrial and scientific applications beyond the visible spectrum. All Goldeye models are available with either a Camera Link or a GigE Vision interface.

Easy software integration with Allied Vision's Vimba Suite and compatibility to the most popular third party image-processing libraries.

AcquireControl adds extensive image analysis functions, such as:

- Pseudo color LUT with several color profiles
- Auto contrast
- Auto brightness
- Analyze multiple regions (rectangular, circle) within the image
- Real-time statistics and histogram display

The Modular Concept offers various options for lens mount, housing variants, optical filters, case design, and more. See the Customization and OEM Solutions webpage for additional options.

Specifications	
Interface	Camera Link Base
Resolution	636 (H) × 508 (V)
Spectral range	1200 nm to 2200 nm
Sensor	FPA 636 × 508   15 μm   Extended Range InGaAs
Sensor type	InGaAs
Sensor size	No standard size
Pixel size	15 μm × 15 μm
Lens mounts (available)	C-Mount
Max. frame rate at full resolution	303 fps
ADC	14 Bit
Image buffer (RAM)	256 MByte
Cooling temperature	-30 °C (default and calibrated)   -20 °C, -10 °C (calibrated)   0 °C (uncalibrated)  User configurable

Output	
Bit depth	8 - 14 Bit
Monochrome pixel formats	Tap Geometry 1X 1Y: Mono8, Mono10, Mono12, Mono14   Tap Geometry 1X2 1Y: Mono8, Mono10, Mono12

820 ke<sup>-</sup>/s (at -30 °C FPA temperature)

452 e (Gain0), 134 e (Gain1), 58 e (Gain2)

68 dB (Gain0), 54 dB (Gain1), 52 dB (Gain2)

1.16 Me<sup>-</sup> (Gain0), 73 ke<sup>-</sup> (Gain1), 25 ke<sup>-</sup> (Gain2)

General purpose inputs/outputs (GPIOs)		
TTL I/Os	LVTTL I/Os: 1 input, 1 output	
Opto-isolated I/Os	1 input, 2 outputs	
RS232	115 200 Baud, 8N1 (adjustable)	

Operating conditions/dimensions	
Operating temperature	-20 °C to +55 °C (housing)
Power requirements (DC)	10.8 V to 30.0 V

Power consumption 21 W at 12 VDC

Mass 740 g (with C-Mount adapter)

Body dimensions (L  $\times$  W  $\times$  H in mm) 90  $\times$  80  $\times$  80

# Quantum efficiency

## Features

#### Image control: Auto

- Auto contrast
- Auto exposure

#### Image control: Other

- Background correction
- Binning
- DPC (defect pixel correction)
- LUT (look up table)
- Multiple ROIs (regions of interest)
- NUC (non-uniformity correction)

#### Camera control

- Acquisition frame rate
- Event channel
- Firmware update in the field
- I/O and trigger control
- Image chunk data
- Stream hold
- User sets

### Sensor temperature control

- Temperature management by TEC
- Temperature status indicator

## Technical drawing

## **Applications**

Goldeye cameras are very sensitive in the SWIR spectrum. They can be used in an extended operating temperature range. Thanks to temperature stabilization and integrated image correction, Goldeye cameras achieve an outstanding image quality with little noise and a high dynamic range. They are well-suited for many typical SWIR applications in various industry branches:

- Semiconductor industry: Solar cell and chip inspection
- Recycling industry: Plastics sorting
- Medical imaging, sciences: Hyper- and multi-spectral imaging, microscopy, optical coherence tomography (OCT)
- Metal and glass industry: Thermal imaging of hot objects (250 °C to 800 °C)
- Agriculture industry: Airborne remote sensing
- Printing industry: Banknote inspection
- Electronics industry: Laser beam profiling
- Surveillance and security: Vision enhancement (for example, seeing through fog)

**White Paper** To learn more about typical application fields for SWIR cameras, download our White Paper: Seeing beyond the visible – short-wave infrared (SWIR) cameras offer new application fields in machine vision
